HOME OF TECHNOLOGIES TRAINING CENTRE

DEVELOP YOUR KNX SKILLS

At Home of Technologies training centre, we make sure that all our trainees leave with skills required to get virtually any KNX job done, no matter big or small. We pride ourselves on the quality of the training and support that we give to our customers which include but are not limited to: Integrators · Developers · Architects · Electrical Contractors

WHY TRAIN AT OUR TRAINING CENTRE?

TOP QUALITY TRAINING BOARDS

Our training boards have products from over 20 manufacturers that demonstrate the real power and usage of KNX protocol.

ABOVE AVERAGE EXAM PASS RATE

Rest assured, no matter how experienced you are, we will make sure you will learn everything that's needed to pass the practical and theoretical exam with confidence.

REAL LIFE TRAINING CONDITIONS

We create real life training conditions where trainees can mock up their own installations. Also, our training programs focus on multi-platform integration, and all exercises are based on real life case studies.

BRING YOUR OWN PROJECT

Got an existing project you are working on? No problem, bring it to us - our experienced tutors and technical staff will help you bring it to life.

EASY ACCESS

We are located in Zone 2 London, which is just outside the congestion zone. Also, the area provides a lot of choice for accommodation and other activities while not at the training centre.

EXCELLENT TRAINING ATMOSPHERE

Trainees experience a fantastic atmosphere of professional knowledge combined with a great social time that provides an opportunity to network and exchange ideas. On average, our students are 65% from the UK and 35% from across the world. During lunch breaks and collaboration sessions you have the chance to make excellent new contacts.

AFTERCARE SUPPORT

We care about our trainees, and we want to make sure that you don't get stuck on your first project. Our aftercare support will always be available to assist on your first project.
